

more
locations

more
flexibility

more
control

Traditionally, more locations have always meant lesser control over people, productivity and security. Not anymore. Because, there is hardly anything traditional about the Matrix COSEC range of access control and time-attendance solutions. Matrix COSEC integrates multiple remote locations seamlessly-removing all barriers of size, time and distance. These futuristic workhorses support biometric and RF technologies and are engineered to adapt to current and future organisation needs. It is no surprise that many progressive organisations like Adani, TCS, L&T, MRF Tyres, BHEL, Sterling and Wilson, SBI, Shriram Finance, Gruh Finance and Gold's Gym have chosen Matrix COSEC.

Functions

- Access Control
- Time-Attendance
