

AN INTERNATIONAL SCHOOL OFFERS A SECURED ENVIRONMENT USING MATRIX VIDEO SURVEILLANCE SOLUTION. OBSERVES RISE IN THE STUDENT INTAKE.

A highly renowned International School in India has 5 branches all across the country. Each branch has about 30 classrooms with 40 students per class. The expectations of the school from the new video surveillance solution were:

- To enhance the image quality as well as degraded performance of the existing video surveillance solution.
- To allow all parents to observe their students' behavior in classroom. The existing surveillance solution allowed only 10 parents to view simultaneously.
- To inform the parents about their children's safe arrival and departure from the school premises along with a snapshot.
- To assist students by offering them classroom lessons which they missed due to their absenteeism.

IMPLEMENTATION OF MATRIX SOLUTION:

- Simultaneous login per HVR in the new solution increased to 120 users due to the higher throughput provided by the recording device.
- Matrix Access Control device is integrated with the HVR connected at the entrance. This database level integration is helping the parents to supervise the security of their child as they get SMS notification regarding their child's arrival and departure from the school premises
- Matrix HVRs are connected along with the microphones which capture the audio and link it with the video. This video feed is provided to the absentees to enable them clear the backlogs. Furthermore, it also helps the Principal of the school to check that genuine and thorough education is imparted to the students.

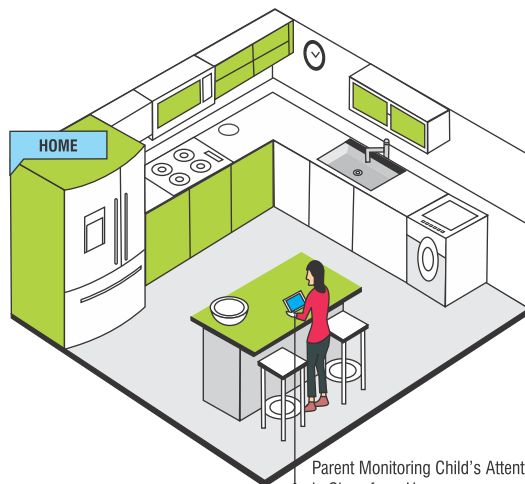

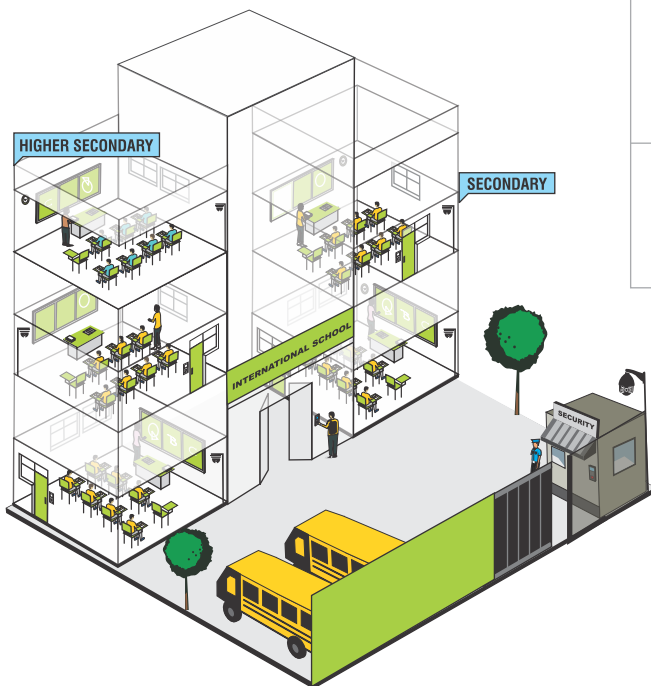

SOLUTION OFFERED BY MATRIX

Video Surveillance:

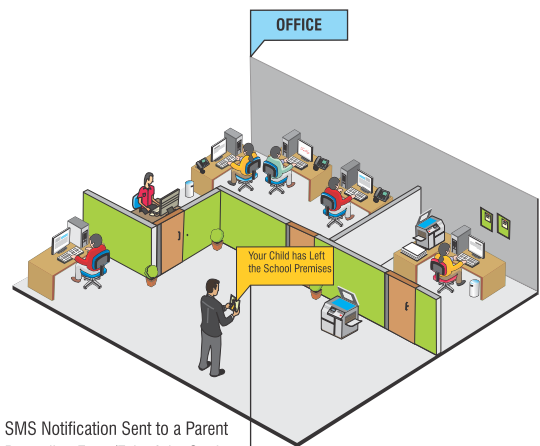

- **Number of Video Recorders:** 60+
- **Number of Cameras:** 240 Analog Cameras and 240 IP Cameras
- **Time-Attendance and Access Control:** 2 Nos of Door Controllers

Main Application:

- Simultaneous Viewing of Cameras by Parents
- Video Surveillance and Access Control Integration

Parent Monitoring Child's Attentiveness in Class from Home

Results
